

SCIENCE MADE FUN KIDS.NET

Tasty or Toxic?

Your Butterfly

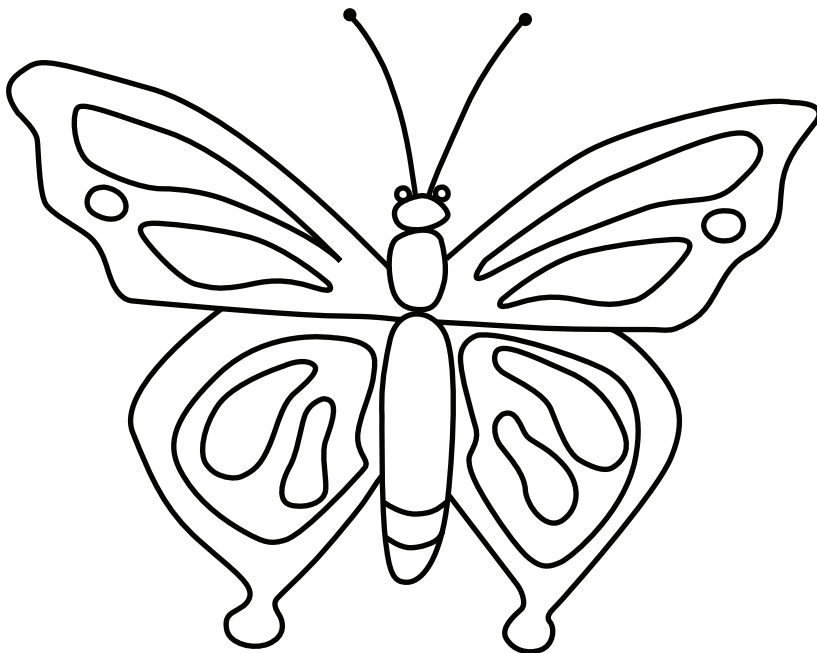

Instructions:

Take a few moments to color "Your Butterfly". Next, color the "Mimic" to look similar to "Your Butterfly". Cut out "Your Butterfly" and the "Mimic" and see if your family can guess which one is the "Mimic"!

The Science Behind It:

In science, we use the word "mimic" to describe animals that copy other animals. Animals adapt to look, smell or sound like another animal in nature for protection against predators. This mimicry gives them a better chance to survive in the wild.

The Mimic
