

Harmless or Killer?

Your Snake

The Mimic

Instructions:

Take a few moments to color "Your Snake". Next, color the "Mimic" to look similar to "Your Snake". Cut out "Your Snake" and the "Mimic" and see if your family can guess which one is the "Mimic"!

Science Behind It:

In science, we use the word "mimic" to describe animals that copy other animals. Animals adapt to look, smell or sound like another animal in nature for protection against predators. This mimicry gives them a better chance to survive in the wild.
